

Easyboot® Glove & Glue-On **POWER STRAP**

Application Instructions

Please read through these instructions before attempting to install. For questions, photos and more detailed instructions please go to this link:

The power strap is an accessory for the Easyboot Glove or Easyboot Glue-On that enables the boot to fit better on hooves that aren't the perfect shape for the boot. It adds stability to the boot, and removes any gaps at the top of for a better fit. It is the perfect solution to horses that cover challenging terrain or who need a tighter boot fit.

You will need: A leather punch, sharp scissors and a Phillips screwdriver.

1. Cut and punch the Power Strap to the correct length. Sizes are indicated on the power strap. You will be punching two holes—one on the left and one on the right. Use a size on your leather punch that matches the dimple size (7/32 is just right.) If you have a size #1 Easyboot Glove cut and punch to the #1 marks. If you have a #2, cut and punch the #2 marks, etc.

2. Punch two holes in the front of your Easyboot Glove or Glue-On hoof boot at the dimpled areas with your leather punch. These will match the holes on your Power Strap

Application Instructions (continued)

3. Last, line up the holes and install the Power Strap to the Easyboot Glove or Glue-On hoof boot using the included hardware. The gold t-nut goes on the inside of the boot, the washer and screw go onto the outside. The screws should be as tight as possible, and the t-nut should be flush with the inside of the boot.

Go Ride!
